Backend: Python, Flask, Django, PHP, REST APIs

CMS / Tools: WordPress, Git, debugging, testing, Agile methodology

Databases: SQLite, MySQL, PostgreSQL, MongoDB, Firebase

Systems: Ubuntu, Linux, Kali, Windows, macOS, Docker

Experience

Loyola University Chicago — Web Developer / Computer Science Teaching Assistant
Chicago, IL | Apr 2021 – Present

- Coded, designed, and maintained department and lab websites using Agile methodology, with regular content updates and improvements to site usability.
- Conducted testing and debugging to ensure cross-browser compatibility, reliable performance, and a consistent user experience.
- Supported faculty and students in a hybrid academic environment through grading, lab support, and exam proctoring.

PiHRate — Lead Software Developer
Remote | Mar 2021 – Feb 2022

- Worked as a Python full-stack developer and automated HR workflows using a data-driven approach.
- Led and mentored a team of developers, providing technical guidance, code review support, and project coordination.

- Contributed to design, development, maintenance, and debugging of software systems aligned with project timelines.

Gemela — Front End Developer
Norton, MA | Feb 2017 – Feb 2020

- Developed a user-friendly website, fixed vulnerabilities, and supported ongoing website maintenance and customer service.
- Participated in weekly meetings with executives and contributed to brainstorming and planning.
- Trained staff on internal web functions and handled minor website updates independently.

Harvard Medical School — Front-end Developer
Boston, MA | Aug 2019 – Nov 2019

- Collaborated with the client to design, structure, and improve an existing website.
- Worked with stakeholders to gather feedback and implement enhancements.
- Identified risks early and supported problem-solving throughout the design and implementation process.

Projects

DriveAware — Principal Software Developer
Loyola University Chicago | Aug 2021 – Dec 2023

- Developed an Android application to collect crime data and improve user experience and efficiency.
- Built a Python program to analyze collected data using Agile methodology.

Lexomics Research — Python Development Researcher
Wheaton College Massachusetts | Jun 2016 – Jun 2019

- Refactored a Django app for digitized text mining and implemented unit tests and test cases.
- Set up and administered an Ubuntu Linux server for the research environment.
- Developed text-analysis algorithms and clustering visualizations for research use.

Education

Master of Science, Computer Science, Merit Award — Loyola University Chicago
Bachelor of Arts, Computer Science — Wheaton College
